**SiloSmashers Restructures to Support New Business Development**

**Strategy & Focus**

*Company Organizes into Business Units to Enhance Services Delivery in Key Government Departments and Agencies*

Fairfax, VA – January 31, 2011 – SiloSmashers, Inc., a in industry-leading, strategy, management, and technology consulting firm, today announced that it had recently restructured the organization into four business units specifically focused on key government departments and agencies where the company plans to expand services delivery and support.

The newly formed business units will be led by highly-respected, senior-level individuals with proven experience and expertise in their particular lines of business. The newly appointed business unit vice presidents include: Robb Jolly, Department of Transportation; Jeffry Nulf, the Environmental Protection Agency; Bill Wernick, Department of Homeland Security; and Sharon Williams Jackson, General Services Administration. Under the new “business unit” organizational structure, the company hopes to streamline its business development efforts and enhance, even more, their customer communications, relationships, and quality of service.

“SiloSmashers is very pleased and excited about entering into the next phase of its evolution,” commented Angela Drummond-Rodgers, the company’s founder and CEO. “Change is essential to continued growth and success as the company prepares for a major expansion of services delivery to broader and specifically-targeted audiences within the government sector.” SiloSmashers, Inc. is a Native American woman-owned strategy, technology, and management consulting firm, founded in 1992, and located in Fairfax, Virginia. SiloSmashers delivers superior services and solutions to the public sector in the areas of project/program management, performance management, and IT security. The company provides innovative, collaborative business approaches, and proven methodologies that enable customers to break down organizational silos and optimize operational efficiency to achieve peak performance and mission success.
